

<Autonomous> AI Agents

JoAi

JoAi deploys AI agents on the MultiversX blockchain, each equipped with its own wallet to manage digital assets and perform tasks. Users interact with their agents through a natural conversation, making blockchain as simple as chatting with a friend.

Problems

Blockchain onboarding
is complex

Rise in on-chain AI capabilities
is slow

Solutions

Fast-track onboarding through natural conversation

Self-teaching of on-chain actions

Size of the market

Total Available Market  **\$790.25B**

Serviceable Available Market  **\$432.18B**

Multivers^x Market Cap  **\$581.02M**

JoAi AI Services

- **On-chain Payments**
Quickly send tokens to friends, family & business
- **Seamless Smart Contract Interactions**
Enabled by in-house developed Warp Protocol and self-improvement capabilities
- **Autonomous On-chain Agent Swarms**
Hire an AI workforce that works 24/7 and proposes actions to users on the blockchain.
- **Agent Training & Fine-tuning**
Agents consume knowledge and use it as a basis for future decision-making.

Revenue Model

JoAi offers a free tier for basic access, with revenue from subscription fees for premium features and credit top-ups for deploying AI agents on the blockchain.

Competitive Advantages

- **Seamless Experience**
JoAi offers an elegant and easy-to-use mobile, desktop, and web app.
- **Development Speed through Self-teaching**
JoAi Agents know how to use on-chain Warp Actions and can create Warp Actions if missing.
- **Autonomous On-chain Agent Swarms**
A world's first. No one has created AI agents Swarms that can participate in DAO experiences before.
- **Built on the most advanced Blockchain: Multivers^x**
Offering almost negligible transaction fees and very soon sub-second transaction speed with scale.

Technology Stack

- **Cortex Service based on Eliza**
Powers core intelligence, Warp handling, data collection, task orchestration and delegation, ...
- **Entity v2 Smart Contract based on Multivers^x SpaceCraft SDK**
With v2, we have advanced the on-chain roles, permission and policy system empowering Swarm.
- **Application Backend based on Laravel**
Serves as a general operations and facilitates billing, communication with Cortex & more
- **Client based on React**
Powers our slick and easy-to-use web app that interacts with all the other services.

Roadmap

Q2

- Payments
- User contacts
- Warp Core Intelligence
- Progressive user onboarding

Q3

- Agent Swarms
- Recurring Tasks
- Agent Goals
- AI Warp Creation
- Mobile App
- Product Hunt Launch

Q4

Further integrations, AI smart contract auditing/recommendations, Desktop app and more
